## nora® Rubber Flooring in Ice Rinks

**nora®**  
Leading  
worldwide

**Exceeds ADA**  
Americans with  
Disabilities Act  
(Guidelines for  
Slip Resistance)

PVC-free

**norament® system**  
**ISO 9002 Certified**  
**ISO 14001 Certified**

Freudenberg Building Systems is proud to be a member of the Ice Skating Institute, the leading ice industry trade association.

Freudenberg Building Systems has been producing high quality **nora**® rubber flooring for over fifty years with over 250 million square feet of **norament**® successfully installed since its introduction. Freudenberg conforms to ISO 9002 and 14001 standards and meets the stringent quality requirements of the ice rink marketplace for safety and performance.

*the indestructible solution*

**nora**® Rubber Flooring is the ideal solution for ice rinks. High density and excellent elasticity allow for **norament**® 992 S and **ecoment**® 992 S grano products to withstand the abuse of ice skate traffic. In the wet areas, the classic round pastille surface drains water; the hammered surface is recommended for dry areas like locker rooms.

**Key Advantages**

- Ice Blade Resistant
- Extra thick
- Unmatched durability and wearability
- Solid and multicolor design options
- Precision-cut, dimensionally stable tiles
- ADA compliance for slip resistance
- Permanently resilient – for comfort underfoot
- Easy and inexpensive maintenance – no waxes required
- 10 year limited wear warranty for **norament**® 992 S; 5 year limited wear warranty for **ecoment**® 992 S grano
