PART 1 - GENERAL

1.1 GENERAL PROVISIONS
   A. Attention is directed to the CONTRACT AND GENERAL CONDITIONS and all Sections within DIVISION 01 - GENERAL REQUIREMENTS which are hereby made a part of this Section of the Specifications.

1.2 DESCRIPTION OF WORK
   A. Work Included: Provide labor, materials and equipment necessary to complete the work of this Section, including but not limited to the following:
      1. Resilient tile flooring for commercial traffic.
      2. Resilient plank flooring for commercial traffic with pre-applied adhesive.
      3. Resilient sheet flooring for commercial traffic.
      4. Resilient sheet flooring for commercial traffic with pre-applied adhesive.
      5. Resilient tile flooring for special fire requirements.
      6. Resilient tile flooring for extra heavy traffic, ice skate, and golf spike resistant.
      7. Resilient tile flooring for pre-installed raised access flooring, or releasable application.
      8. Resilient tile flooring for electrostatic dissipative protection.
      9. Resilient sheet flooring for electrostatic dissipative protection.
     10. Resilient stair treads (one-piece nosing, tread and riser).
     11. Resilient stair accessories.
     12. Resilient wall base, sanitary base, and accessories.
   B. Related Work: The following items are not included in this Section and are specified under the designated Sections:
      1. Section 033000 CAST-IN-PLACE CONCRETE for concrete substrate; slab surface tolerances; vapor retarder for applications on or below grade; requirement for 83/90 degree riser and tread edge angle for stair tread and nosings.
      2. Section 055100 METAL STAIRS AND RAILINGS; requirement for 83/90 degree riser and tread edge angle for stair tread and nosings.
      3. Section 061000 ROUGH CARPENTRY for plywood substrate and surface tolerances.
      4. Section 096900 ACCESS FLOORING for resilient floor covering for access panels.
   C. References (Industry Standards):
      1. American Association of Textile Chemists and Colorists (AATCC):
         a. AATCC 134 Electrostatic Propensity of Carpets
         a. ANSI ESD S97.2 Floor Materials and Footwear – Voltage Measurement on a Person
      3. ASTM International (ASTM):
         b. ASTM D412 Standard Test Methods for Vulcanized Rubber and Thermoplastic Elastomers – Tension
         c. ASTM D2047 Standard Test Method for Static Coefficient of Friction of Polish-Coated Floor Surfaces as Measured by the James Machine
d. ASTM D2240  Standard Test Method for Rubber Property – Durometer Hardness

e. ASTM D3389  Standard Test Method for Coated Fabrics Abrasion Resistance (Rotary Platform, Double Head Abrader)

f. ASTM D6499  Standard Test Method for the Immunological Measurement of Antigenic Protein in Natural Rubber and its Products

g. ASTM E84  Standard Test Method for Surface Burning Characteristics of Building Materials

i. ASTM E662  Standard Test Method for Specific Optical Density of Smoke Generated by Solid Materials

j. ASTM E1745  Standard Specification for Water Vapor Retarders Used in Contact with Soil or Granular Fill under Concrete Slabs

k. ASTM E2179  Standard Test Method for Laboratory Measurement of the Effectiveness of Floor Coverings in Reducing Impact Sound Transmission Through Concrete Floors

l. ASTM E2180  Standard Test Method for Determining the Activity of Incorporated Antimicrobial Agent(s) in Polymeric or Hydrophobic Materials

m. ASTM F150  Standard Test Method for Electrical Resistance of Conductive and Static Dissipative Resilient Flooring

n. ASTM F155  Method of Test for Temper of Strip and Sheet Metals for Electronic Devices

o. ASTM F386  Standard Test Method for Thickness of Resilient Flooring Materials Having Flat Surfaces

p. ASTM F710  Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring

q. ASTM F925  Standard Test Method for Resistance to Chemicals of Resilient Flooring

r. ASTM F970  Standard Test Method for Static Load Limit

s. ASTM F1344  Standard Specification for Rubber Floor Tile

t. ASTM F1482  Standard Practice for Installation and Preparation of Panel Type Underlayments to Receive Resilient Flooring

w. ASTM F1859  Standard Specification for Rubber Sheet Floor Covering Without Backing

x. ASTM F1860  Standard Specification for Rubber Sheet Floor Covering With Backing

y. ASTM F1861  Standard Specification for Resilient Wall Base

z. ASTM F2055  Standard Test Method for Size and Squareness of Resilient Floor Tile by Dial Gage Method

aa. ASTM F2169  Standard Specification for Resilient Stair Treads

bb. ASTM F2170  Standard Test Method for Determining Relative Humidity in Concrete Floor Slabs Using in situ Probes

cc. ASTM F2199  Standard Test Method for Determining Dimensional Stability of Resilient Floor Tile after Exposure to Heat

dd. ASTM F3010  Standard Practice for Two-Component Resin Based Membrane-Forming Moisture Mitigation Systems for Use Under Resilient Floor Coverings

e. ASTM G21  Standard Practice for Determining Resistance of Synthetic Polymeric Materials to Fungi

4. European Norm (FTM):

a. FTM 101 C 4046  Static Decay

5. International Organization for Standardization (ISO):

a. ISO 140  Measurement of sound insulation in buildings and of building elements

b. NFPA 258  Test Method for Specific Density of Smoke Generated by Solid Materials
1.3 SUBMITTALS
   A. Product Data: Submit manufacturer’s product data, installation guide and maintenance guide for each material and accessory proposed for use.
   B. Samples: Submit three representative samples of each product specified for verification.

1.4 QUALITY ASSURANCE
   A. Manufacturer Qualifications: Provide resilient flooring manufactured by a firm with a minimum of 10 years’ experience with resilient flooring of type equivalent to those specified.
      1. Manufacturer’s quality management system must have ISO 9001:2000 approval.
      2. Provide resilient flooring products, including wall base, accessories and subfloor preparation products from one manufacturer to ensure color matching and compatibility.
      3. Manufacturer shall be capable of providing technical training and technical field service representation.
   B. Installer Qualifications: Acceptable to manufacturer of resilient flooring or INSTALL (International Standards & Training Alliance) resilient certified for the requirements of the project.
   C. Sustainable Design Requirements:
      2. Construction waste take back program for the purpose of reducing jobsite waste by taking back uninstalled waste flooring. Details of the nora® program are available at www.nora.com/us.
      3. Flooring surfaces that are easily cleaned and do not require coatings and stripping, or use chemicals that may be hazardous to human health.
      4. Supply all required products that are CA 01350 compliant.
      5. Flooring that is free of materials known to be teratogenic, mutagenic or carcinogenic.
      6. Flooring that contains no polyvinyl chloride or plasticizers.
      7. Flooring that contains no halogens.
      8. Flooring that contains no asbestos.

1.5 DELIVERY, STORAGE, AND HANDLING
   A. Deliver materials in labeled packages. Store and handle in strict compliance with manufacturer’s recommendations. Protect from damage due to weather, excessive temperatures, and construction operations.
   B. Deliver materials sufficiently in advance of installation to condition materials to the required temperature for 48-hours prior to installation.

1.6 PROJECT CONDITIONS
   A. The installation area must be fully enclosed, weather tight, and climate controlled between 63°F and 75°F and 40% to 60% ambient relative humidity (RH) for at least 48 hours prior, during and 72 hours after installation (do not use gas fueled blowers). Dew point must be avoided. The substrate must be at least 5°F above dew point to be considered acceptable.

1.7 WARRANTY
   A. Provide manufacturer’s standard limited warranty for wear, defect, bond and conductivity.

PART 2 - PRODUCTS

2.1 ACCEPTABLE MANUFACTURER
   A. Basis-of-Design: nora systems, Inc., 9 Northeastern Blvd., Salem, NH 03079; telephone 800-332-NORA or 603-894-1021; fax 603-894-6615.
2.2 RESILIENT TILE FLOORING FOR COMMERCIAL TRAFFIC

A. Rubber Floor Tile:

1. Product Name: noraplan® lona 3.0 mm, Article 267B
2. ASTM Specification: Type I Grade 1
   ASTM F1344 Standard Specification for Rubber Floor Tile
3. Limited Wear Warranty: 5 years
4. Material: nora® vulcanized rubber compound 913 with environmentally compatible color pigments that are free of toxic heavy metals like lead, cadmium or mercury
5. Composition: Heterogeneous rubber compound
6. Color: 24 standard colors
7. Surface: Textured
8. Back of Tile: Double-sanded smooth
9. Material Size (ASTM F2055): ± 0.018 inches (± 0.45mm) is required
   24.015 inches by 24.015 inches (610mm by 610mm)
10. Squareness (ASTM F2055): Meets requirements
11. Thickness (ASTM F386): ± 0.005 inches (± 0.127mm) is required
    0.12 inches (3mm)
12. Dimensional Stability (ASTM F2199): Meets requirements
13. Flammability (E648/NFPA 253): NBSIR 75 950, 1.09
14. Smoke Density (ASTM E662/NFPA 258): NBS, 150 (flaming) and 246 (non-flaming)
15. CAN/ULC-S102.2: Surface Burning, FSC1 of 125 and SD of 370
16. Burn Resistance: Resistant to cigarette and solder burns
17. Slip Resistance (ASTM D2047): Static coefficient of friction, Neolite dry 0.97, Neolite wet 0.94 (not recommended for ramps)
19. VOC’s: This flooring is GREENGUARD Gold Certified for Low VOC Emissions, Blue Angel Certified and CA 01350 compliant
20. Latex Allergies (ASTM D6499): Inhibition Elisa, results are below detection level
21. Sound Absorption (ASTM E2179/ISO 140): ∆ IIC 14, ∆ Lw 10dB (compare only ∆ values)
22. Sound Generation: 67.2 dBA, 68.9 dBC and 20.9 Sones, Independently tested
24. Static Load (ASTM F970): ≤ 0.005 inches with 250 lbs. is required
   Residual compression of 0.003 inches with 800 lbs.
25. Rolling Load Limit: ≤ 550 lbs. / sq. inch, with no forklift traffic
26. Abrasion Resistance (ASTM D3389): 1.1 lbs. (500g) load on H-18 wheel with 1000 cycles, 0.003 oz. (0.09g) weight loss
27. Elongation (ASTM D412): Modulus @ 10% is 1,299.0 lbs. per sq. inch
28. Oil & Grease Resistance: No
29. Heat Resistance (ASTM F1514): Easily achieved with all batches and regular maintenance
Avg. ΔE ≤ 8.0 is required
30. Light Resistance (ASTM F1515): Easily achieved with all batches and regular maintenance
Avg. ΔE ≤ 8.0 is required
32. Thermal Transmission (ASTM C518): R-value of 0.04
33. Cleaning:
   Cleaned and maintained effectively using water, nora® pads and a suitable cleaning machine, without the use of any factory and/or field-applied coatings. Also without using any chemicals that may be hazardous or containing any teratogenic, mutagenic or any other ingredients known to be carcinogenic. Refer to nora maintenance guides for product specific details.
34. Stain Removal:
   Samples of the product must be provided for stain removal testing by the owner. Sample size must be 24 inches by 24 inches, pre-cleaned by manufacture per published recommendations. Samples must have no coatings, sealers, floor finish or other manually or mechanically applied finish on the surface of the product. Stain testing must consist of application of common healthcare related disinfectants and chemicals to include, but not limited to, Betadine, Methylene Blue, Silver Nitrate and alcohol based hand sanitizer. Duration of test period must be no less than one week. Removal of chemicals must be in accordance with manufacturers published cleaning and maintenance recommendations.
35. Substrate Preparation:
   Per ASTM F710 and the nora® Installation Guide

2.3 RESILIENT SHEET FLOORING FOR COMMERCIAL TRAFFIC
   A. Rubber Sheet Floor Covering:
      1. Product Name:
         noraplan® Iona 3.0 mm, Article 167B
      2. ASTM Specification:
         ASTM F1859 Standard Specification for Rubber Sheet Floor Covering Without Backing
      3. Limited Wear Warranty:
         5 years
      4. Material:
         nora® vulcanized rubber compound 913 with environmentally compatible color pigments that are free of toxic heavy metals like lead, cadmium or mercury
      5. Composition:
         Heterogeneous rubber compound
      6. Color:
         24 standard colors
      7. Surface:
         Textured
      8. Back of Sheet:
         Double-sanded smooth
         39.37 feet by 48 inches (12m by 1.22m), ≥ amount specified
      10. Thickness (ASTM F386):
         ± 0.006 inches (± 0.15mm) is required
         0.12 inches (3mm)
11. Dimensional Stability (ASTM F2199):
   ≤ 0.15% in both directions is required
   Meets requirements

12. Flammability (E648/NFPA 253):
   ≥ 0.45 watts/sq. cm for Class 1 is required
   NBSIR 75 950, 1.09

   < 450 is required
   NBS, 150 (flaming) and 246 (non-flaming)

14. CAN/ULC-S102.2:
   Surface Burning, FSC1 of 125 and SD of 370
   Meets requirements

15. Burn Resistance:
   Resistant to cigarette and solder burns

   ≥ 0.5 is required
   Static coefficient of friction, Neolite dry 0.97, Neolite wet 0.94
   (not recommended for ramps)

   Resistant to bacteria, fungi and micro-organism activity
   Meets requirements

18. VOC’s:
   This flooring is GREENGUARD Gold Certified for Low VOC
   Emissions, Blue Angel Certified and CA 01350 compliant

19. Latex Allergies (ASTM D6499):
   Inhibition Elisa, results are below detection level

20. Sound Absorption (ASTM E2179/ISO 140):
   Δ IIC 14, Δ Lw 10dB (compare only Δ values)
   67.2 dBA, 68.9 dBC and 20.9 Sones, Independently tested

21. Sound Generation:
   67.2 dBA, 68.9 dBC and 20.9 Sones, Independently tested
   Meets requirements

22. Hardness (ASTM D2240):
   ≥ 85 is required
   Shore type “A”, 92

23. Static Load (ASTM F970):
   ≤ 0.005 inches with 250 lbs. is required
   Residual compression of 0.003 inches with 800 lbs.

24. Rolling Load Limit:
   ≤ 550 lbs. / sq. inch, with no forklift traffic

25. Abrasion Resistance (ASTM D3389):
   ≤ 0.035 oz. (1.0g) is required
   1.1 lbs. (500g) load on H-18 wheel with 1000 cycles, 0.003
   oz. (0.09g) weight loss
   Modulus @ 10% is 1,299.0 lbs. per sq. inch

26. Elongation (ASTM D412):
   ≥ 300 lbs. per sq. inch is required
   No

27. Oil & Grease Resistance:
   Easily achieved with all batches and regular maintenance

   Avg. ΔE ≤ 8.0 is required
   Easily achieved with all batches and regular maintenance

29. Light Resistance (ASTM F1515):
   Avg. ΔE ≤ 8.0 is required
   < 2000 Volts at 20% RH

30. Static Generation (AATCC 134/ANSI ESD S97.2):
   R-value of 0.04

31. Thermal Transmission (ASTM C518):
   Cleaned and maintained effectively using water, nora® pads
   and a suitable cleaning machine, without the use of any
   factory and/or field-applied coatings. Also without using any
   chemicals that may be hazardous or containing any
   teratogenic, mutagenic or any other ingredients known to be
   carcinogenic. Refer to nora maintenance guides for product
   specific details.

32. Cleaning:
   Samples of the product must be provided for stain removal
   testing by the owner. Sample size must be 24 inches by 24
   inches, pre-cleaned by manufacture per published
   recommendations. Samples must have no coatings, sealers,
   floor finish or other manually or mechanically applied finish on
   the surface of the product. Stain testing must consist of
   application of common healthcare related disinfectants and
   Alcohol.
34. Substrate Preparation: Per ASTM F710 and the nora® Installation Guide

PART 3 - GENERAL

3.1 GENERAL CONTRACTOR RESPONSIBILITIES

A. Supply a safe, climate controlled building and subfloor as detailed in the nora Installation Guide (available at www.nora.com/us)

B. A subfloor that meets the requirements of ASTM F710 Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring is required, or as detailed in the nora Installation Guide or nora® nTx Installation Guide as appropriate.

C. A secure storage area that is fully enclosed, weather tight, and climate controlled between 63°F and 75°F and 40% to 60% ambient relative humidity (RH) for at least 48-hours prior and during the installation, so the flooring contractor can acclimate all materials.

D. An installation area that is fully enclosed, weather tight, and climate controlled between 63°F and 75° and 40% to 60% ambient relative humidity (RH) for at least 48-hours prior, during, and 72-hours after installation (do not use gas fueled blowers). If this is not possible, contact the nora® Technical Department.

E. Areas with direct prolonged exposure to sunlight should be protected with the use of Low E glass doors, windows or facades that reduce the UV transmissions to less than 1%.

F. Areas of the flooring subjected to direct sunlight, for example through doors or windows, must be covered using blind, curtains, cardboard or similar materials for 24-hours before, during, and for a period of 72-hours after the installation to allow nora “wet” adhesives to cure. Do not allow traffic when using wet set adhesives for a minimum of 12-hours and prohibit rolling loads for 72-hours. When using nora® nTx or nora® dryfix 750, the flooring can be trafficked immediately with no restrictions. All flooring must be protected from damage during construction operations using Masonite, plywood or a similar product. Before laying the panels the flooring surface must be free of all debris. Lay panels so that they are edge to edge and tape the joints to prevent movement and debris entrapment. Inspect the flooring before covering and after removal for final acceptance.

G. Conduct post-installation cleaning after 72-hours for wet set adhesives. Conduct post-installation cleaning immediately for installations using nora dryfix 750 or nora nTx. Refer to the appropriate nora® Maintenance Guide for product specific details.

3.2 FLOORING CONTRACTOR RESPONSIBILITIES

A. Provide trained installers that have at least one of the following:
   1. Approved by nora systems, Inc. or INSTALL (International Standards & Training Alliance) certified for the requirements of the project.
   2. An effective installation manager to manage the project, installers, and ensure that all of the required procedures are followed as detailed in the nora Installation Guide (available at www.nora.com/us).

B. Follow all requirements in the appropriate nora Installation Guide or nora nTx Installation Guide.

END OF SECTION
