MAINTENANCE GUIDE: STAIR TREAD MAINTENANCE

Surface Textures

Hammered Surface

Round (Pastille) Surface

General Remarks

norament® stairtreads have a production residue. This residue must be removed (see Post-Installation Maintenance) before the stair treads are used, otherwise it will attract dust and dirt. norament® stairtreads have a natural luster and do not require any artificial coating.

General Precautions

1. Always use "wet floor" signs and/or caution tape when performing any wet cleaning.
2. Refer to SDS for proper personal protection requirements before using cleaning products.
3. Do not flood the stair treads/floor.
4. The stair treads/flooring will be slippery when wet or contaminated with foreign materials. Promptly clean-up spills and any foreign materials to maintain the flooring's slip resistant properties.
5. Never use grit brushes, or black, brown or 3M™ diamond cleaning pads.
6. Use a DoodleBug™ with a 3M™ #5300 (blue) cleaning pad.
7. To reduce dirt, debris and moisture coming into the facility, maintain walk-off mats at all exterior entry points.
8. Spots from petroleum-based products such as grease and tar must be removed with spotting agents containing solvents. Immediately rinse with water after spot removing and allow to dry.
9. Do not allow any metal furniture or trash cans to be in contact with the wet floor.

Post-Installation Maintenance

A general cleaning must be performed after installation and before the space is occupied. If joints/seams are cold welded, flooring can be wet mopped after 8 hours, machine scrubbed after 24 hours and, if required, burnished after 72 hours.

The following procedures should be performed by the facility:

1. Dust mop or vacuum the stair treads/flooring to remove dirt or grit.
2. Remove any adhesive residue and/or spots of foreign material using Windex® or Goof Off® solvent.
3. Wet mop the stair treads/flooring, from the top down (do not stand on the wet floor), using a diluted high pH (12-13pH) post-maintenance product cleaner/degreaser and allow the solution to dwell for a minimum 10 minutes. Mop one flight at a time.
4. Lightly scrub the stair treads/flooring with a DoodleBug™, using a cut 3M™ #5300 (blue) cleaning pad. Scrub from the top stairtread going down. Always stand on the area you scrubbed.
5. Wet mop the soiled solution. Rinse the stair treads/flooring with clean water and allow to dry.

Daily Maintenance

1. Dust mop or vacuum the stair treads/flooring to remove dust and dirt.
2. Damp mop the stair treads/flooring using a diluted daily maintenance product, and allow to dry.

Acceptable Pads

Post installation maintenance	3M™ #5300 (blue)
Daily maintenance	n/a

Note: Never use grit brushes, or black, brown or 3M™ diamond cleaning pads.
