

noraplan[®] valua plank

NATURE-INSPIRED DESIGN.
BOUNDLESS POSSIBILITIES.

nora[®]

A myriad of options for every healing environment.

With noraplan® valua plank, your design possibilities are as vast as nature itself.

We asked architects and designers around the world what they were looking for in a healthcare flooring system. The answer was nearly unanimous: a nature-inspired design that meets the stringent safety and maintenance requirements for the well-being of those in both public and patient-occupied spaces.

The embodiment of nature-inspired texture and detail, noraplan® valua plank brings the soothing outside elements of nature indoors while providing ultra-durable performance perfected for a wide array of applications in today's

patient-centered spaces. To support indoor air quality for optimum health and safety, noraplan valua plank is GREENGUARD Gold Certified for Low VOC Emission.

Available with nora® nTx, noraplan valua plank utilizes a pre-applied, solvent-free adhesive system that allows for immediate exposure to foot traffic and rolling loads, providing ultimate flexibility for difficult construction and renovation schedules. The elimination of wet adhesives enables fast and clean installation with minimal disruption in your working facility.

Six colors. Three sizes. Your creativity.

Beveled plank edges offer a natural, individual look that is easy to clean and maintain. Heat welding is not required, allowing for ease of installation while providing a hygienic seal.
