nora® nTx

THE REVOLUTIONARY FAST INSTALLATION SYSTEM
nora® nTx – The advantages at-a-glance

- No need to spread adhesives, and no adhesive open time
- No wait time after installed, allowing for immediate welding, initial cleaning, and rolling loads
- High productivity, speedy installation with less effort
- Fewer steps to an exceptional finish
- Substantial time savings so you stay on schedule
- Low odor allows for ease of installation for renovation and occupied spaces
- No moisture or pH limits and no testing required

Install nora® nTx on any of these surfaces:

- Concrete subfloor or leveling compounds
- Existing flooring
  - VCT
  - Linoleum
  - Ceramic
  - PVC
- Exceeding Moisture Limits
- No testing necessary
How is it installed over an existing floor covering?

The below showcases, in a numbered step by step, how noraplan® with nora® nTx can be installed over existing flooring within a matter of hours.

1. Office, Berlin: before installing
2. Preparing the subfloor
3. Vacuuming
4. Applying the nora® nTx 020 primer. Sanding and vacuuming
5. Cutting the seam
6. 9 am Install nora® flooring with nTx
7. Pull off the protective film
8. Roll
9. Immediately move in
10. 4 pm Operational
Complete system from one source

1 - Subfloor, or existing flooring surface
2 - nora® nTx 020 primer acts as the bonding agent
3 - Protective film
4 - nora floor covering with nora nTx
