## FREQUENTLY ASKED QUESTIONS

Q: What is the size of nora<sup>®</sup> wall base?

A: Length: 120 feet, Height: 4 inches (Additional heights and profiles are available upon request).

Q: How is nora wall base installed?

A: The base is rolled out and cut to fit using a utility knife, adhesive is applied to the backside of the wall base, then the wall base is pressed onto the wall. The installation is finished by hand rolling to set the base onto the wall.

Q: What adhesive is required?

A: nora does not provide adhesives for standard wall base. The installing party should use an industry standard wall base adhesive.

Q: How are outside wall corners cut?

A: Outside corners are back scribed, the wall base is heated and then bent to form the corner. nora does not recommend grooving the back of the base when wrapping around outside corners.

Q: How are inside wall corners cut?

A: Inside corners can be cut and scribed to each wall or they can be scored on the back and bent into the corner.

Q: Can nora wall base be custom color matched?

A: nora wall base can be custom color matched to any paint swatch, fabric or existing competitor wall base.

Q: What nora wall base toe options are available?

A: Wall base is standard with a cove toe. Straight base without a toe is available upon request.

Q: What is the maintenance protocol?

A: Remove any spots of foreign material using Windex<sup>®</sup> or Goof Off<sup>®</sup> solvent then, damp mop the wall base using a microfiber mop or cloth and a diluted daily maintenance product and allow to dry.

Q: What is the lead time for shipping?

A: nora wall base is primarily drop shipped directly to the project site with lead times of approximately 2-3 weeks.

Q: What is the warranty?

A: nora wall base has a 5 year limited wear warranty.
