

nora dryfix mr

QUICK INSTALLATION IN
HIGH MOISTURE AREAS

nora[®]
by Interface[®]

What is nora dryfix™ mr?

nora dryfix mr is a double-sided dry adhesive tape for the installation of nora® floor coverings in high moisture areas. It is easy to install with no mixing or adhesive clean up, and it allows for immediate traffic after installation is complete. With nora dryfix mr, there's no need for relative humidity testing, in-situ probes or waiting for adhesives to dry. Think of the cost savings and downtime eliminated.

Renovating a space and unsure if a vapor retarder is in place? You'll be covered with nora dryfix mr. For new buildings, it is suitable for all common substrates. And it performs reliably in high performance areas like operating rooms where heavy point loading occurs.

With the ability to compliment installations of the nora® nTx™ system, nora dryfix mr gives you more flexibility for quick turnover installations where moisture is *or might be* a challenge.

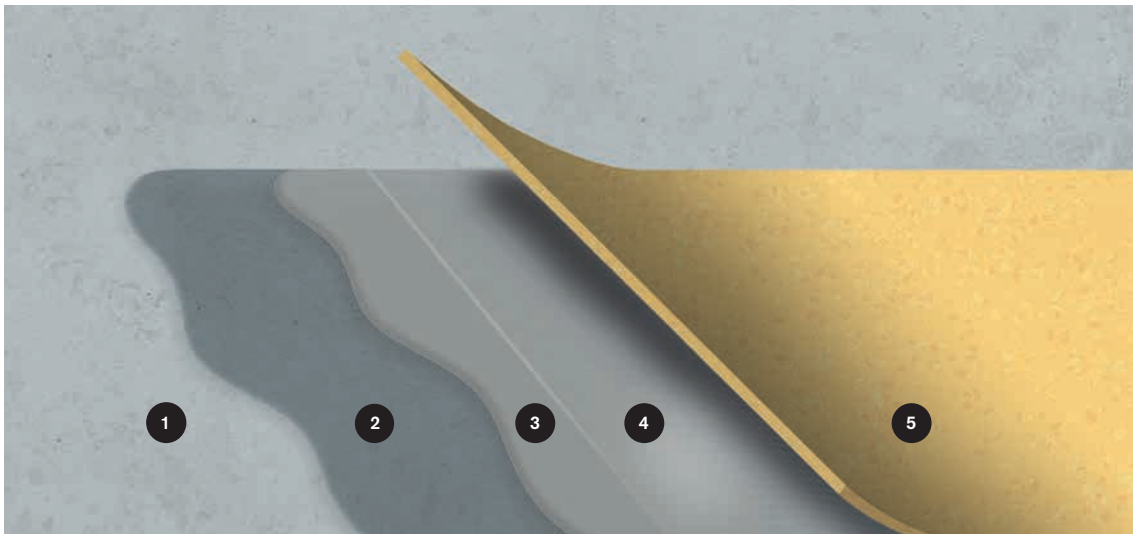

Benefits:

- Moisture resistance up to 99% relative humidity (RH)
- Quick and easy dry installation
- Less downtime with immediate trafficking after installation
- No RH testing and no vapor retarder required
- Suitable for all common substrates
- Reliable in high performance areas
- GREENGUARD Gold certified for low VOC emissions

Specifications:

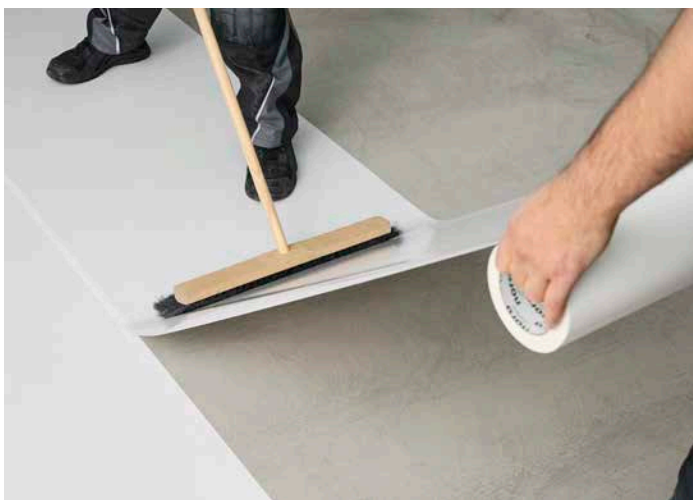

- Art. 6556
- Roll Size: 30" x 250' (76 cm x 76.2 m)
- Coverage: 625 SF
- Shelf Life: 24 months

nora dryfix mr | the system configuration

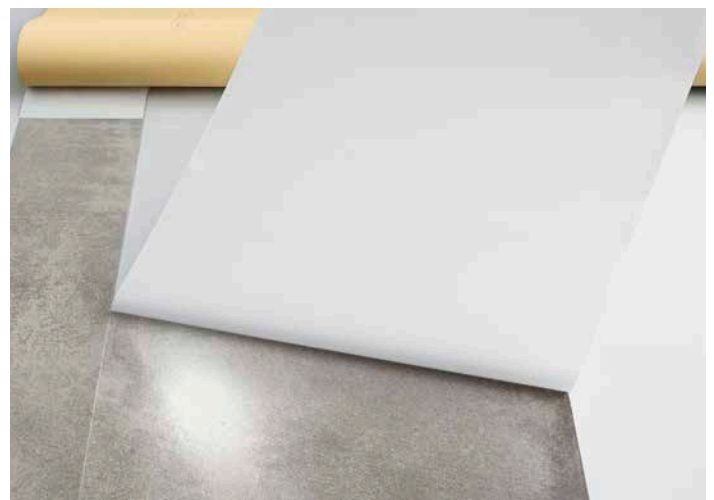

1 Substrate 2 Primer (where needed) 3 Leveler (where needed) 4 nora dryfix mr 5 nora floor covering

Quick installation in a few steps:

1) Roll out nora dryfix mr onto the substrate

2) Remove protective wax paper

3) Install the floor covering

4) Roll the floor covering and weld where specified
