- Description: Mixture of the substances listed below with nonhazardous additions.

· Hazardous ingredients:			
CAS: 14808-60-7	Quartz (crystalline silica)	 Carc. 1A, H350; STOT RE 1, H372	3-<8%
CAS: 13463-67-7	Titanium dioxide	 Carc. 2, H351	1-<3%

Additional information:

This product contains crystalline silica (quartz sand) which has been classified by IARC as a Group 1 carcinogen (human carcinogen). Evidence is based on the chronic and long-term exposure workers have had to respirable sized crystalline silica dust particles. This product is used in liquid form only and therefore does not pose a dust hazard / carcinogen hazard during its use. However, respirable silica may be generated from working procedures such as grinding e.g. In general, inhalation of silica dust should be avoided. Therefore, for your own safety wear a suitable NIOSH-approved respirator in all occasions when handling of the product generates dust. The exact percentages of the ingredients have been withheld by the manufacturer as trade secrets. For the wording of the listed hazard phrases refer to section 16.
