CONTRIBUTION OF NORA® PRODUCTS TO LEED v4
Introduction

This comprehensive guide contains all the relevant information you need about nora products and the LEED v4 rating system. It was developed to make the process of LEED v4 assessments easier and more effective for you.

At nora® we take sustainability seriously – and not only at corporate level. We see transparency of environmental data as our responsibility to support green building.

We understand that collecting the documentation required for planning, construction and certification is time-consuming. In order to support your efforts, on the following pages we have included details on the sections of the LEED v4 rating system nora products can contribute to. We’ve also included links and product-specific documentation to accompany your submittals so you have everything you need all in one place.

The information in this brochure relates to the LEED v4 rating system as of 2018.
### Building Product Disclosure and Optimization

**Environmental Product Declarations (EPD)**

</tbody>
</table>

#### nora® Contribution

nora® has product-specific, Type III, third-party certified EPDs for their standard noraplan and norament floor coverings.

#### Submittal Documentation

nora®’s product-specific, third-party verified EPDs which conform to ISO 14025 and EN 15804, can be downloaded using the following links:

**US EPD:**

Building Product Disclosure and Optimization
Sourcing of Raw Materials

Intent
To encourage the use of products and materials for which lifecycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts. To reward project teams for selecting products verified to have been extracted or sourced in a responsible manner.

Requirements
Use permanently installed building products that meet at least one responsible extraction criteria:

- Extended producer responsibility
- Bio-based materials
- Certified wood products
- Materials reuse
- Recycled content

nora® Contribution
Various nora® products contain considerable preconsumer recycled content. Recycled content is the sum of postconsumer recycled content plus one-half the preconsumer recycled content, based on cost.

Please refer to the table on pages 10/11 for the recycled content of specific products.

Submittal Documentation
Product-specific recycled content as mentioned in the table on pages 10/11.

Option 2: Leadership Extraction Practices

Option 1: Material Ingredient Reporting

Building Product Disclosure and Optimization
Material Ingredients

Intent
To encourage the use of products and materials for which lifecycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts. To reward project teams for selecting products verified to have been extracted or sourced in a responsible manner.

Requirements
Use at least 20 different permanently installed products from at least five different manufacturers that publish the chemical inventory of the product to at least 0.1% (1000 ppm) using one of the USGBC approved programs, including published Health Product Declarations (HPDs) in compliance with the Health Product Declaration Open Standard.

nora® Contribution
Option 1: Material Ingredient Reporting
nora has published HPDs in compliance with the Health Product Declaration Open Standard for standard noraplan and norament floor coverings.

Submittal Documentation
Documentation with tables on pages 10/11.

Published Health Product Declarations (HPDs) are available in the Health Product Declaration Public Repository at https://www.hpd-collaborative.org/hpd-public-repository/.

Option 2: Material Ingredient Optimization

Option 1: Diversion

Building Product Disclosure and Optimization
Material Ingredients

Intent
To encourage the use of products and materials for which lifecycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts. To reward project teams for selecting products verified to have been extracted or sourced in a responsible manner.

Requirements
Use products that document their material ingredient optimization using the paths below for at least 25%, by cost, of the total value of permanently installed products in the project.

- GreenScreen v1.2 Benchmark. Products must have ingredients that have all ingredients assessed with the GreenScreen List Translator are valued at 100% cost and products that have all ingredients assessed with the GreenScreen List Translator are valued at 150% cost.
- C2C v3 Gold: 100% of cost; C2C v3 Silver: 100% of cost; C2C v3 Gold or Platinum: 150% of cost
- C2C v2 Gold: 100% of cost; C2C v2 Platinum: 150% of cost; C2C v3 Silver: 100% of cost; C2C v3 Gold or Platinum: 150% of cost
- International Compliance Path – REACH Optimization. End use products and materials that contain no ingredients listed on the REACH Authorization or Candidate list are valued at 100% of cost.

nora® Contribution
Cradle to Cradle (C2C) Certified
nora has Cradle to Cradle (C2C) Silver v3.1 Certification for standard noraplan and norament products.

International Compliance Path REACH Optimization
All nora products are free of ingredients listed on the REACH Authorization or Candidate list.

Submittal Documentation
Documentation with tables on pages 10/11.

Cradle to Cradle (C2C) Certificates are available on the Cradle to Cradle Products Innovation Institute website at https://c2ccertified.org/products/registry

Construction and Demolition Waste Management

Intent
To reduce construction and demolition waste disposed of in landfills and incineration facilities by recovering, reusing, and recycling materials.

Requirements
Recycle and/or salvage nonhazardous construction and demolition materials. Calculations can be by weight or volume but must be consistent throughout.

Path 1: Divert 50% and Three Material Streams
Divert at least 50% of the total construction and demolition material; diverted materials must include at least three material streams.

Path 2: Divert 75% and Four Material Streams
Divert at least 75% of the total construction and demolition material; diverted materials must include at least four material streams.

nora® Contribution
The nora® Take-Back Program for waste and scrap material from recent installations of new nora® flooring and accessories can contribute to obtaining points under this credit.

Submittal Documentation
Details about the nora Take-Back Program can be found at www.nora.com
Low-Emitting Materials

**Option 1:** Product Category Calculations

**Option 2:** Budget Calculation Method

**Intent**
To reduce concentrations of chemical contaminants that can damage air quality, human health, productivity, and the environment.

**Requirements**
This credit details requirements for volatile organic compound (VOC) emissions into indoor air and the VOC content of materials, as well as the testing methods by which indoor VOC emissions are determined. Different materials must meet different requirements to be considered compliant for this credit.

- **Category:** Flooring
  - General Emissions Evaluation
  - VOC content requirements for wet-applied products

- **Category:** Interior adhesives and sealants applied onsite (including flooring adhesive)
  - General Emissions Evaluation
  - VOC content requirements for wet-applied products

**nora® Contribution**
nora’s GREENGUARD Gold certifications demonstrate compliance with California Department of Public Health (CDPH) Standard Method v1.1-2010 and the General Emissions Evaluation requirement of this credit. Alternatively, projects outside the U.S. can also use nora products with Blue Angel, Indoor Air Comfort GOLD or EMICODE EC1PLUS certification as they are compliant with the German AgBB Testing and Evaluation Scheme (2010).

In addition, all nora adhesives meet VOC content requirements of SCAQMD as well as local regulations.

Please refer to the table on pages 10/11 for the compliance of any specific product.

**Submit Documentation**
Documentation with tables on pages 10/11.

### Norament® Products to LEED v4

1. Norament® product specific, type III, 3rd party certified environmental product declaration (EPD) that conforms to ISO 14025 and EN 15804
2. Pre-consumer recycled content
4. Cradle to Cradle (C2C) Silver v3.1 Certified
5. Norament® flooring is in compliance with REACH requirements as they do not contain substances on the authorization or candidate lists
6. Norament® Take-Back Program
7. GREENGUARD Gold certified and compliant with California Department of Public Health (CDPH) Standard Method v1.1-2010 and General Emissions Evaluation
8. Blue Angel, Indoor Air Comfort Gold and EMICODE EC1/EC2 are all in compliance with the German AgBB Testing and Evaluation Scheme (2010) and General Emissions Evaluation
9. Adhesives in compliance with the South Coast Air Quality Management District (SCAQMD) Rule 1168 and wet-applied VOC content requirements

### Contribution of Norament® Products to LEED v4

- Norament® products contribute to LEED v4 requirements through various certifications and compliance with various standards.

---

2. Norament® product specific, type III, 3rd party certified environmental product declaration (EPD) that conforms to ISO 14025 and EN 15804.
3. Pre-consumer recycled content.
5. Cradle to Cradle (C2C) Silver v3.1 Certified.
6. Norament® flooring is in compliance with REACH requirements as they do not contain substances on the authorization or candidate lists.
8. Blue Angel, Indoor Air Comfort Gold and EMICODE EC1/EC2 are all in compliance with the German AgBB Testing and Evaluation Scheme (2010) and General Emissions Evaluation.
9. Adhesives in compliance with the South Coast Air Quality Management District (SCAQMD) Rule 1168 and wet-applied VOC content requirements.
