

WRIGHT STATE UNIVERSITY

Challenge: Develop a flooring solution for Oelman Hall that stands up to excessive foot traffic and can be efficiently maintained, while anchoring the design in the lobby, corridors and lecture hall of the building.

Project Requirements: Durability, Low maintenance, Acoustics

Flooring Solution: noraplan environcare™

Architect/Designer: Annette Miller Architects – Dayton, OH

“We needed a durable floor covering that would hold up to the high foot traffic in the building.”

Javan Conley, Senior Project Manager,
Wright State University

Wright State University recently updated Oelman Hall, the building on campus that houses the school’s College of Science and Mathematics. Originally constructed in 1966, Oelman Hall often surprises new students and visitors with its unconventional design for an academic building, which features colorful wall panels, bold patterned floors and dynamic lighting and ceiling treatments.
