

LEMONS MILL ELEMENTARY

Challenge: Address maintenance, comfort and life-cycle cost concerns with a durable flooring that will also hold up in the busiest areas of a newly constructed elementary school.

Project Requirements: Comfort underfoot, Maintenance, Sustainability

Flooring Solution: norament[®] grano, noraplan[®] eco

Architect/Designer: Sherman Carter Barnhart – Lexington, KY

nora[®]

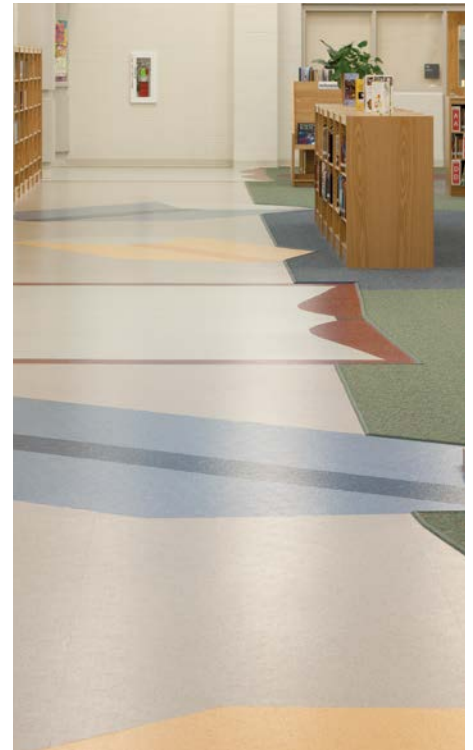

Lemons Mill Elementary

Georgetown, KY

"nora products provide a comfortable, low-maintenance and long-lasting solution that will be here long after I'm gone."

Mike Luscher, Director of Facilities,
Scott County Schools

Lemons Mill Elementary, a new 70,000-square-foot school within Kentucky's Scott County School District, selected noraplan® eco for their classrooms. "We've had very good experience with nora in our district, which is why we continue to use them," says Mike Luscher, Director of Facilities. After visiting a school outside of the district that used norament® grano in its lobby and cafeteria, Luscher and his team decided to do the same at Lemons Mill. "Rubber is going to hold up a lot longer than VCT, and that's what I was looking for – as well as something low maintenance. We are saving on custodial products and custodial time by not having to apply finishes to the floor."
