## Timeless design in a fascinating form

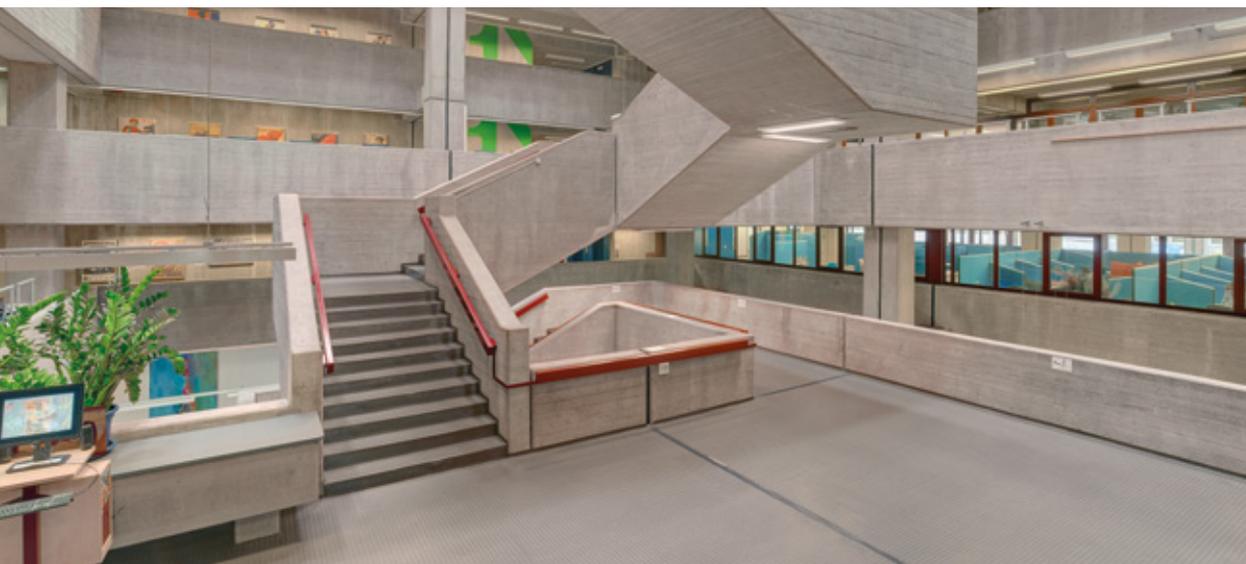

Trends in architecture and design are constantly changing: while colour and patterns dominate the style today, linear clarity might be preferred tomorrow.

norament 926/825 is a timeless flooring that is not at the mercy of design trends. Its purist look and typical pastille structure makes it a design icon for the ages. Rubber gives it an extra robustness that leaves it attractive for decades.

# An indestructible floor with a unique design

No other flooring turns so many people's thoughts immediately to rubber. The unmistakable matrix structure of round pastilles provides the space with a unique look. The purist character of the flooring makes it ideal for modern interiors. Its vibrant appearance and unique effect give it a premium quality.

norament 926 is a regular choice wherever maximum levels of resilience and robustness are required. Spaces such as entrance halls, libraries, museums and industrial plants have relied on this unique flooring for decades.

The round pastille has been used at Ruhr University Bochum library since 1973. Nearly fifty years of student footfall have not affected its robust nature.

Thanks to its high footfall sound insulation, slip resistance and excellent fire-retardant properties, this rubber flooring is ideal for surfaces over which thousands of people walk every day.

So it is only logical that the corresponding stair surfaces are also laid with this material - with the matching stair-tread norament 926.

Two numbers, one flooring: norament 926 is designed for use in spaces that are subject to the most extreme levels of stress. At 0.8 mm thinner, norament 825 can be used in spaces that are subject to high levels of stress.

# Clear colours and an inspiring structure

The modern colour palette of norament 926/825 is worthy of a classic. These colours will always hit the mark, no matter what tomorrow's trends are.
