nora stairwell solutions
The first choice for smart, robust stairwells

Wherever you need a tough, low-maintenance and visually attractive floor covering, nora systems has the ideal solution. All our rubber floor coverings are extremely durable and keep their good looks far into the future.

To complement your design scheme, nora floor coverings come in a wide range of attractive designs with a comprehensive choice of optional design elements or customisation.

Depending on your needs, we offer two distinct stairwell solutions. For standard stairs and stairwells, our one-piece norament® stairtreads are ideal. For other stairwells, simply choose your preferred nora floor covering and pre-cut it to achieve a precision fit. Whichever option you choose, all our solutions are available with a full range of matching and contrasting accessories.

norament stairtreads

The integrated one-piece norament stairtreads combine stair nosing, tread and riser as a single element. This gives you the performance properties you need along with ease of installation and low-cost maintenance.

Total versatility

norament stairtreads are suitable for use in all sorts of environments, from healthcare and education to social housing, public buildings and industrial applications. They also provide features such as strips in contrasting colours to support accessibility for visually impaired people.

Integrated systems, tangible benefits

We offer a comprehensive package of flooring and accessories to suit any stairwell application, all from a single supplier.

Drawing on all our expertise in floor covering technology, norament stairtreads and accessories provide the functionality you require and have been designed for simple and fast installation. Based on our one-piece construction, the tread and riser can be installed at the same time using nora stepfix 240 double-sided tape, which is odourless and solvent-free.

Key benefits:

- One-piece stair solution for fast installation
- No waiting time for glue to dry
- Immediate use after installation
- Ideal for heavy-traffic stairwell areas e.g. schools, hospitals, factories
- Easy to clean thanks to jointless installation
Complete compatibility

norament stairtreads integrate seamlessly with all other nora flooring solutions and can be cost-effectively installed in new builds and renovations alike. As required, they can also be equipped with a range of different signal or safety stripes to guide users or mark the edge of stairs.

Because they are made from the same materials as the rest of our flooring solutions, it is easy to achieve an integrated look throughout the entire building. Depending on your needs, you can specify a variety of different characteristics, such as enhanced wear resistance or anti-slip properties.

Perfect for renovation projects

Because they can be used immediately after installation, norament stairtreads are an excellent solution for renovation work. This is especially relevant for hospitals and factories, where even planned downtime can have major cost and service implications. The simplicity of the system also means that social housing renovations can be carried out with a minimum of disruption to residents.

Thanks to the efficiency of the one-piece design and installation technique, there is almost no downtime during flooring replacement. Finally, to complement or enhance your existing design scheme, norament stairtreads are available with both pastille and hammerblow surfaces in a wide range of colours and with matching accessories.

Whatever the requirements of your stairwell project, norament stairtreads from nora systems give you all the functionality, flexibility and long-lasting good looks you need.

Before After

nora pre-cut flooring with stair nosings

All nora floor coverings can also be installed on stairs. In this case, the nosing of the stair needs to be covered by a nora stair nosing. The floor coverings need to be pre-cut to the corresponding dimension. This solution enables you to install high-quality floor coverings on any shape or design of stairwell, including spiral staircases. nora offers a comprehensive range of matching accessories to suit norament and noraplan® floor coverings.

Barrier-free buildings

An inclusive society requires that everyone should have equal access to all facilities and be able to play a full part in society, whatever their abilities. These expectations play a very significant role in the design of buildings.

Stairwells and areas accessed by stairs must be clearly recognizable and easy to navigate. nora offers a variety of stair nosing in contrasting colours to ensure that the stair is clearly visible. This is especially helpful in assisting people with a visual impairment to find their way around buildings.

We will be happy to create your own choice of contrasting colour combinations and help you select and install the ideal solution.
norament stair treads

Pre-shaped stair coverings consisting of stair nosing, riser and tread all in one piece for straight steps with right-angled edge. For extremely heavy traffic stairwell areas.
