

Nora donated flooring for the activity center of the China Rehabilitation Research Center for Deaf Children

nora donated the rubber flooring to the new activity center of the China Rehabilitation Research Center for Deaf Children (hereinafter CRRCDC). As the only national rehabilitation organization for hearing and speech impairment in China, CRRCDC is committed to promote the development of the national hearing and speech rehabilitation services in order to improve the rehabilitation for deaf children.

“It’s our honor to provide nora rubber flooring to the activity center to create a safe space for deaf children. Floor coverings take up a large proportion of a room’s area and are crucial in creating comfortable ambiance and good indoor air quality to encourage recover.” said Susanna Loecher, Managing Director Greater China of nora systems GmbH.

Wu Yi, Director of infrastructure, said: “We are deeply grateful to the donation from nora. nora floorings are made by environmental friendly materials like natural rubber and have low emission levels. So they contribute to the healthy and uncontaminated indoor air. It’s very important for the children here. It is also worth mentioning that nora provided the support in all phases of the project. They advised the best solution to solve the problem of subfloor and taught us how to maintain the flooring. nora did better than we would have imagined and our children will benefit from it.”
