

Product:Special cleaning agent **AG3****Short description:**

Aqueous cleaning solution with an acid content, and with special active ingredients.

Field of application:

The cleaning agent concerned is suitable for removing stains produced on rubber floorcoverings by Eosin G, silver nitrate and skin disinfectants (Hyromerfen. Merfen Tinture, Rivanol and Disulphine Blue).

Properties:

Form:	Fluid
Colour:	Colourless
Odour:	characteristic
Boiling point/Boiling range:	100°C
Self-igniting:	Product is not selfigniting.
Danger of explosion:	Product does not present an explosion hazard.
Solubility in / Miscibility with water:	Fully miscible.

Shelf life: approx. 12 months from date of manufacture.

Application:

The following instructions for use must be precisely complied with in order to obtain optimum cleaning results.

1. Clean the floorcovering involved from other soiling with a customary cleaning agent (must be wax-free). Remove any residues of the reagent solution (salt encrustations) with copious amounts of water.
2. Rub down the stains concerned thoroughly with alcohol (methylated spirits) so as to remove any wax residues.
3. Cover the stains with a soft absorbent cloth, and soak this cloth thoroughly with the AG 3 cleaning agent. Press the wet cloth against the floorcovering's surface profile so as to ensure that the liquid penetrates wherever the floorcovering has been discolored. Then cover with film, and fix in place at the edges with adhesive tape or similar.
If you can make sure in some other way that the cleaning agent will not dry in, you need not cover the areas concerned with foil and adhesive tape.
4. Allow the cleaning solution to act on the stains for a lengthy period, depending on the type of stains you are treating, their intensity and age (the "younger" they are, the better!). Silver nitrate: 1 – 1.5 hours, Hydromerfen: 4 – 5 hours. The cleaning agent must not be allowed to dry in.
5. Wipe off cleaning solution, wash off thoroughly with copious amounts of water (IMPORTANT!).

Safety instruction:

We would ask you to read the safety data sheet prior to processing the special cleaning agent and to follow the instructions given there.

Will damage your health if swallowed. Irritates eyes, respiratory organs and skin.

Avoid contact with your eyes or skin. Wear rubber gloves and protective goggles. If the agent does come into contact with your eyes and/or skin, rinse it off thoroughly with water.

The instructions given in this information sheet must be meticulously complied with. They reflect the current status of our knowledge and experience, but cannot be construed as entailing any liability on our part.
