

1.	Initial cleaning after installation (if necessary)	 <p>Machine wet scrubbing using an active or microfibre pad or a red pad* (see Cleaning and Polishing Agent table).</p> <p>If no strong construction site contamination is present, no initial cleaning is required and routine cleaning can be started immediately.</p>	 <p>First vacuum off the loose dirt with a wet vacuum cleaner, then scrub again with clean water and vacuum or scrub and dry.</p>
2.	Initial polishing treatment / care	<p>Not recommended. The flooring is ready for use after installation and does not require any additional maintenance.</p>	
3.	Routine cleaning (machine)	 <p>Optimal cleaning results are achieved with a scrubber dryer using an active or microfibre pad or a red pad* with a suitable wash polish (see Cleaning and Polishing Agent table).</p>	
	Routine cleaning (manual)	 <p>Dust-binding wiping using suitable microfibre mop covers or tack cloth.</p>	 <p>Adhesive water-soluble or emulsifiable contaminations are removed by wet mopping (see Cleaning and Polishing Agent table).</p>
4.	Interim cleaning	 <p>To remove walking or heel marks and to maintain a uniform and optically appealing look of the floor covering, we recommend cleaning as needed using a white polishing pad*. Wash polish (see table Cleaning & Care Products)</p>	
5.	Intensive cleaning	 <p>Machine wet scrubbing using an active or microfibre pad or a red pad* and suitable cleaning agent (see Cleaning and Polishing Agent table).</p>	

General notes:

- Generously dimensioned dirt-retention areas result in an effective reduction of dirt being carried in.
- Please observe the instruction in the product and safety data sheets of the cleaning & polishing agents used.
- This cleaning recommendation applies to firmly bonded floor coverings.
- * Suitable pads: 3M, etc.

Cleaning & polishing agents

The cleaning & polishing agents listed in the table are **recommendations by wash polish manufacturers** in the **German market**. Depending on the premises, it may be useful to use **products and processes that differ from the** standard, but only use them according to the wash polish manufacturer's recommendation. Please refer to the **product-specific manufacturer's** instructions! Of course, you can also use suitable cleaning agents from non-listed wash polish manufacturers according to their recommendation. Our experience shows that the best results are achieved with these cleaning agents, therefore nora recommends that the following list be observed.

Companies	Initial machine cleaning after installation, if necessary / intensive cleaning	Cleaner with wipe and white pad	Manual routine cleaning with 2-step wiping
Diversey GmbH 68219 Mannheim Tel.: +49 (0)621/8757-0	Taski forward 400 ml to 8 l water	Taski Combi 800 ml to 8 l water	Taski 300 80 ml to 8 l water
