# Pure colour, nothing more

For more than 70 years, noraplan uni has inspired architects the world over. The pure nature of the colours gives them the freedom to make a bold statement in the space or take a reductionist approach with an understated monochrome look.

This combination of single-colour, matte design and the proven technical features of our rubber flooring cannot be found anywhere else on the market. The formula has been specially chosen to maximize the aesthetic impact of a single-colour surface and make noraplan uni the highlight of any room.

# Plain colours, endless possibilities

noraplan uni is the ideal flooring for architects who want elegant, purist interior design. The plain-coloured, matte surface provides a uniform, matte aesthetic that maintains its visual impact even over large areas. Its clean character lends a modern, line-free ambience to any room.

Each of the 16 standard shades works harmoniously with every other as adjacent sections or inlays. This allows you create visual accents, emphasise certain sections or provide orientation for those visiting the building.

noraplan uni also wins over property developers and owners with its functional properties: the material is durable and easy to maintain. It is also manufactured as part of the Carbon Neutral Floors™ program\*, which satisfies growing customer demand for sustainability.

It's no wonder that this interior design classic has been used to enhance sophisticated architecture for decades, the world over.

\*nora® floor coverings are CO<sub>2</sub> neutral over the entire product life cycle. We are continuously working on further reducing CO<sub>2</sub> emissions within the value chain through various measures. Remaining CO<sub>2</sub> emissions are offset by the acquisition of certificates relating to audited emission reduction projects.

# Colours that define style

noraplan uni has lost nothing of its impact and elegance in its 70 years of existence. The new colour palette makes it easy for designers and architects to find the right ambience for their building.
